

MOST™ Hand Tool

Cuts and Strips Plastic Fibre Optic Cables

Features:

- High quality cut finish
- Optimum results due to the separation of the cutting and stripping process.
- Automatic indexing of cutting blade after every cut.
- Tool will lock automatically when the cutting blade requires replacement.
- Operator friendly due to ergonomic design.

Compatible Tyco Electronics Products

MOST™ Plastic Fibre Optic Cables

The cutting and stripping process are combined within this newly developed hand tool.

It enables the professional preparation of plastic fibre optic cables.

The special geometric profile of the blade results in a very high quality finish of the cut ends of the cables. This ensures minimal increases in insertion loss.

The cutting blade indexes automatically after every cut. This guarantees a consistent high quality of the finished cut.

A count down of the last 150 possible cuts prior to the change of the blade kit is provided in a display. The blade kit can be exchanged very easily. A spare blade kit is available, PN 2-0539783-7.
