

CRIMPATIC 970

Features

- Compact, space-saving design
- Inching mode for set up

Compatible

- Side/End feed Tyco Electronics and non-Tyco Electronics terminals for large wire sizes

Specifications

- Press Force: 11,241 lb [5.62 ton]
- Rated Power: 1.5 kW
- Power Supply: 3-phase 400 V, 50 Hz / 440 V, 50 Hz
- Stroke: 1.73" [44mm]
- Wire Size: 5/6 AWG [up to 16 mm²]
- Cycle Time: aprox. 0.4 s
- Lower dead center at 157.8mm without adapter plate; 135.78mm with adapter plate
- Noise Press Level: approx. 75 dbA without tool
- Weight: 484 lb [220 kg]
- Dimensions (HxWxD) without reel holder: 33.1 x 15.75 x 24" [840x400x610mm]

CRIMPATIC 970 for reeled crimp terminals or in loose piece form.

The machine permits the cost effective manufacture of crimp-connections with a high production efficiency.

The CRIMPATIC 970 Machine is capable of processing wires of up to approximately 16mm² (AWG 5 1/2), depending on the terminal stock thickness.

The unit can be supplied with or without crimp process monitoring, or it may be retrofitted later.

The machine is equipped with:

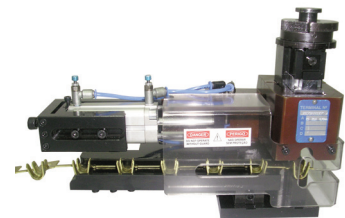

- Reel Holder
- Foot Switch
- Guarding
- Machine Lighting

Options are available upon request.

- Crimp force monitoring
- Fine adjustment of lower dead center
- Paper spooler

CRIMPATIC 970-50
